RE: Worthey Truck Sales
601 - 615 N.W. ByPass

During your recent inspection of the above referenced facility, you indicated several areas of concern. Our firm has been retained by Worthey Truck Sales to assist in addressing these concerns. Richard Wilson with Worthey Truck Sales has made several contacts concerning various items listed in your October 12, 1995 letter and is now awaiting replies from these individuals.

We have contacted Randy Lymon with the City of Springfield Public Works Department regarding discharging wastewater from the power washer to the City's sanitary sewer system. We are now working with Mr. Wilson to determine how best to accomplish connection to the system and meet the City's requirements (particularly enclosing the wash area).

We hope to have a written response for each item listed in your letter by November 15 as requested in your letter. If you have any questions or need additional information, please do not hesitate to call.
